

# CUBE LINE CH110

TYPE	Pass-through dishwasher
LINE	CUBE LINE
BASKET	500x500
SIZE	620x770x1435/1900h

Reliability and ease of use: these are the key words of the **CUBE** line. The **ADVANCE** panel is the real strength of the CUBE line thanks to its **4 washing cycles** and one automatic drain cycle (with drain pump installed). On the control panel you can easily view the tank and boiler temperature, the messages of the **Self-diagnosis** system, the **Scheduled Maintenance** warning and the **intelligent Start button**, which changes colour to always display the dishwasher status very easily. The simple and extremely efficient electronic card offers the possibility of setting and controlling the rinsing and draining times, the washing and rinsing temperatures and the relative Thermostops, crucial for ensuring excellent washing results.

The **CH110** hood-type dishwasher is the right solution for establishments that have to wash different types of dishes, proving capable of washing glasses, dishes, medium-sized objects and GN 1/1 gastronorm trays in just a 620 mm width, ensuring a maximum productivity of 60 baskets/hour (1080 dishes/hour). The hood-type models are fitted with an easily removable basket support for easy cleaning and a **rounded moulded tank with integral filters** for perfect draining and absolute hygiene. The **"PUSH TO START"** cycle start system ensures less waste, preventing the start of empty washes. There are 4 wash cycles of 60, 90, 120, 240 seconds in the UP version.

The standard **double electric rinse-aid and detergent dispenser** ensures maximum hygiene at each wash cycle with great savings: the **moulded washing and rinsing arms** ensure reliability and durability. The bodywork is made entirely of **AISI 304 steel** and has been designed with all of the components in the front for **easy technical assistance**. Sturdy and reliable dishwashers to best deal with every moment of your day.
